Attention: The Federal Communication Commission [FCC]

Commercial Broadcasting Division

To Whom It Should Concern:

I would like to ask your administration a question?

What do you think can be done about the various commercially broadcasted television affiliations, celebrities, newscasters, guests and prisoners who continue to use prestige to impose unconstitutional leverage, suspicion, and death threats upon others and my family.

The licensed broadcasting stations have {some way or another} been continuously providing an opening for the entertainment world to unconstitutionally eavesdrop and impose unlawful repressive tactics against one person, or another. And they tend to deceptively utter and claim they are providing a service on behalf of society, the police, and government, etc.!

With all due respect, I am writing this letter out of sheer concern and necessity as a dedicated public servant and citizen. To summarize my recent attempts to inform you of this situation let me begin here. As I have mentioned to your commission before, I have contacted the office of the United States President, USA Attorney General and State Attorney General about this activity. I had briefly described this activity to your commission approximately 4 months ago and I also stated I had submitted an application for an appointment with the office of the United States Presidential administration. [regarding commercial/public broadcasting and policy.]

Please also realize I requested an application to start my own commercial broadcasting station in the past and I know that what I am complaining about is far outside the boundaries of the US Constitution and laws to do with providing a public service and use of broadcasting time. I also know that the activity of electronic eavesdropping and the repressive tactics deployed by various newscasters and celebrities are really criminal and outside the US Constitution and Bill of Rights; regarding the 1983/1984 House of Representatives document concerning entertainers and drug use.

My aim is to help the commission realize how damaging these activities are.

Although, I had speculated in **1985** and even today if the licensed television and radio stations had been taken over by various radicals and people involved in the War against Drugs, etc.! I respectfully request that you tell, or officially write the television and radio stations letting them know they could lose their broadcasting license and rights to profit if they continue to allow militantly inclined criminals minds, warmongers or radicals to have television time.

I have become weary of these activities, and I hope your administration can handle what I have asked. Because it is of grave concern to me and my family, who have been directly affected by the activities.

Best Wishes.

Sincerely,

Larry K. Reed [electronically signed]

Larry K. Reed

Former Primary **98** Candidate To Become California Lieutenant Governor

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service. thank you

Sincerely,

bernardj. keating

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Wayne Van Zandt
